

Application - File Management

Verify that OpenClaw has been configured.

Enter the root environment (if OpenClaw was installed under the root directory using root privileges).

```
sudo su
```

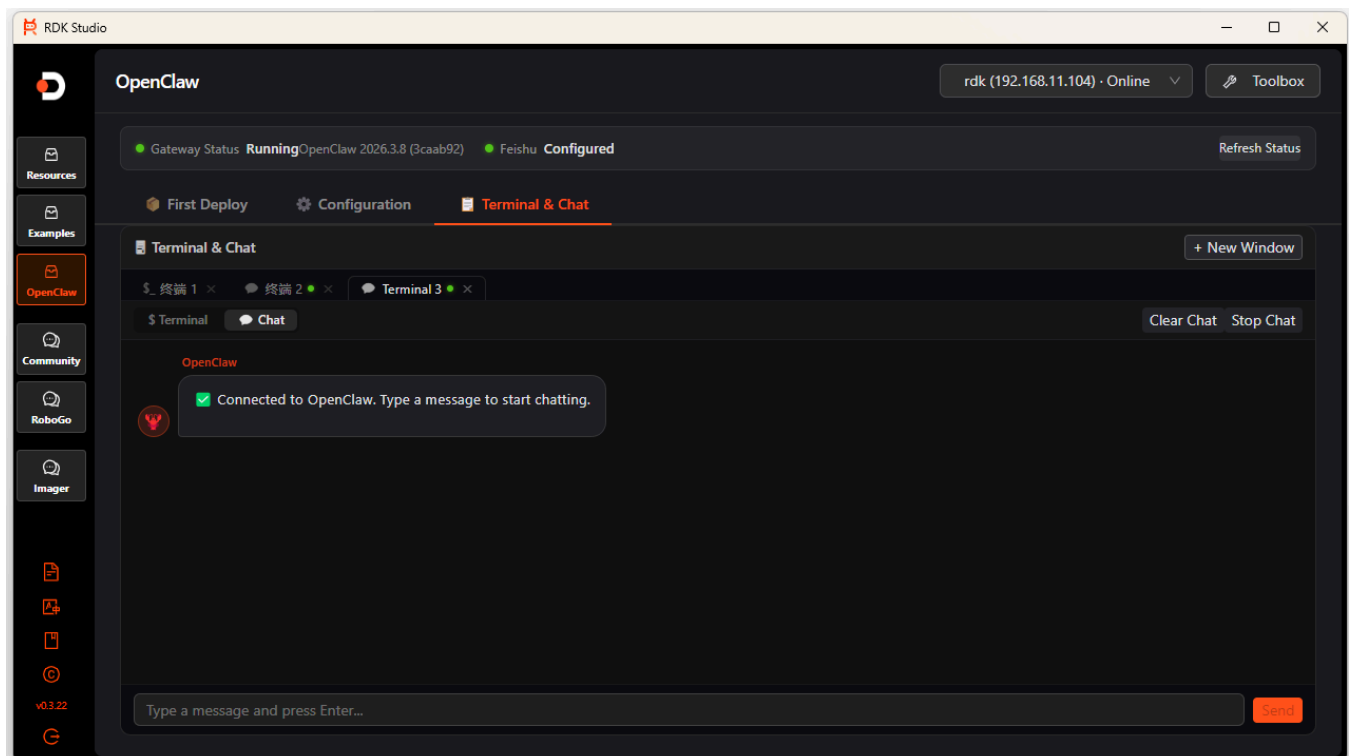

Start the Gateway. (Typically, the Gateway starts automatically, so running this command is not required.)

```
openclaw gateway
```

Interact via the TUI terminal interface.

```
openclaw tui
```

Alternatively, open the chat interface directly, or access it via WhatsApp.

Enter interaction commands.

There is a file named "test.txt" in the desktop folder on RDK MagicBox. Write "hello, openclaw" to the "test.txt" file. Then rename "test.txt" to "Hello.txt".
