

Application - Script Execution

Verify that OpenClaw has been configured.

Enter the root environment (if OpenClaw was installed under the root directory using root privileges).

```
sudo su
```

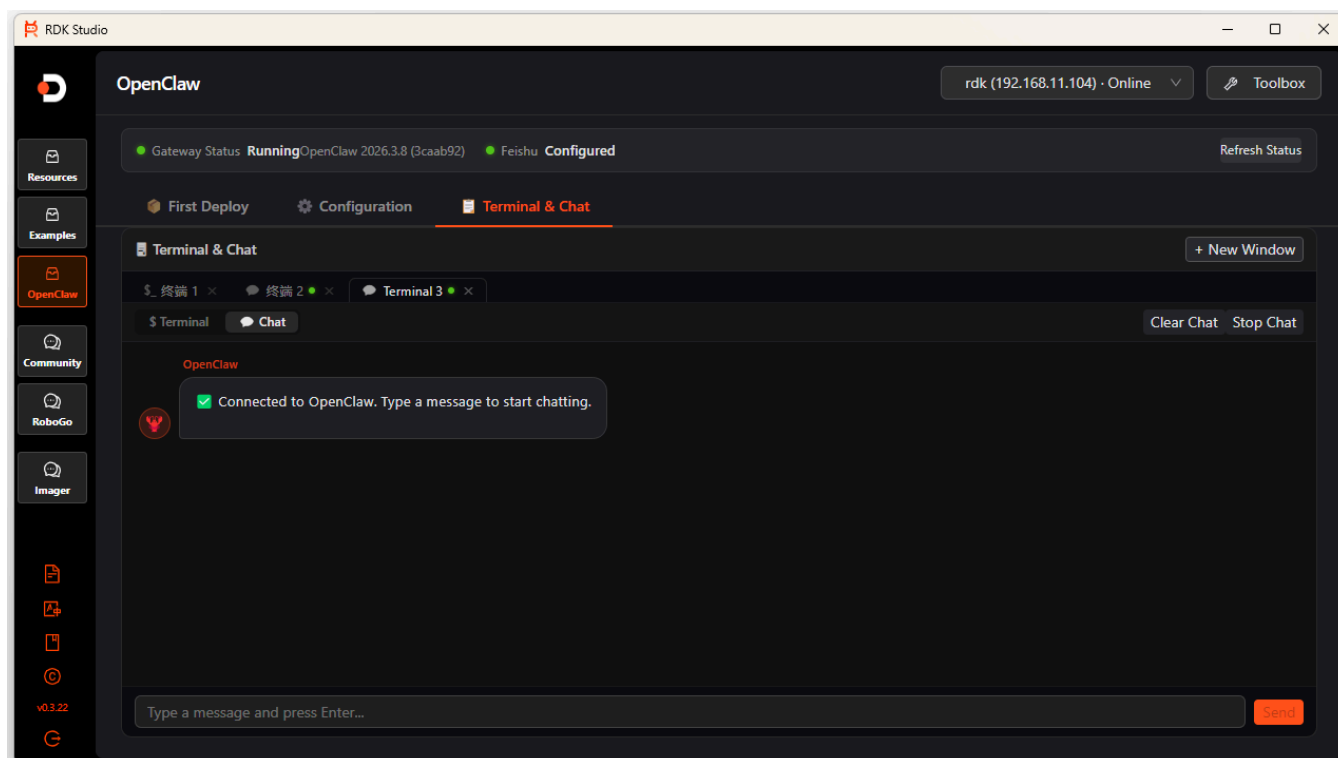

Start the Gateway. (Typically, the Gateway starts automatically, so running this command is not required.)

```
openclaw gateway
```

Interact via the TUI terminal interface.

```
openclaw tui
```

Alternatively, open the chat interface directly, or access it via WhatsApp.

Enter the interaction command

Write a Python script for the RDK MagicBox on the desktop. The program should exit when the user presses the "q" key. Then run this script to open the camera.
